Overview of Joint Health and Safety Committee certification training

Focus on workplace-specific hazards - JHSC Part 1, 2, and Refresher training

JHSC Certification: Part 1 (three days)

(Disponible en français)

This mandatory course is available in three formats: self-paced e-learning, instructor-led virtual training, and instructor-led classroom training. Participants learn how to recognize, assess and control workplace hazards, the rights and duties of certified members, and how to conduct effective workplace inspections and incident investigations.

JHSC Certification: Part 2 (three days)

This mandatory course is available in two formats: instructor-led virtual or classroom training. Focusing on the concepts of recognition, assessment, and control of hazards, and evaluation of the hazard controls, participants learn how to apply these concepts to a minimum of six hazards relevant to their own workplaces. In addition, learners practise drafting action plans and recommendations for the employer.

JHSC Certification Refresher (one day)

This mandatory course is available in two formats: instructor-led virtual or classroom training. The one-day refresher training program is legally required every three years and provides the most up-to-date information that JHSC professionals can use to keep their workplace health and safety practices current and effective.

New free training

Health and Safety Representative (HSR) Basic Training

This free small business e-learning training program provides guidance on the powers, functions and duties of the workplace health and safety representative. Reimbursement of \$150 for successful completion is also available for businesses that qualify. Employers with 6 to 19 workers are required to ensure workplaces have a worker Health and Safety Representative, as stated in the Occupational Health and Safety Act.

Also available

- Incident Investigation
- Introduction to Safety Programs
- Manage Employees
- Mine Ventilation - Underground
- Occupational Health and Hygiene
- Planned Inspection and Observation
- Practise Effective Communication
- Prepare for Emergencies - Underground

Safety culture and program assessment

Based on findings from the Institute for Work and Health, there are ten occupational health and safety factors predictive of a company's health and safety performance. Using these factors, WSN developed the Climate Assessment and Audit Tool (CAAT) to properly assess the maturity of a firm's health and safety culture and system. Ask your WSN Health and Safety Specialist for more information.

About Workplace Safety North

Your local health and safety partner

An independent not-for-profit, Workplace Safety North (WSN) is one of four sector-based health and safety associations in Ontario.

Headquartered in northern Ontario, WSN provides province-wide Ministry-approved workplace health and safety training and services for the mining and forest products industries.

With health and safety specialists located across the province, WSN and its legacy organizations have been helping make Ontario workplaces safer for more than 100 years.

A leading provider of health and safety training and consulting, businesses call upon WSN for expert advice and information.
